

## D12 Fixed Toxic Gas Detection with AutoTest

Project: Supply gas detection

Location: Rotherham, UK

### Project Summary

The project involved the installation of fixed toxic gas leak detectors in a tanker fill area.

- Project Scope
- Supply of gas detection
- Calibration and commissioning
- Training

### Added Value/Benefits

The new systems were supplied with an AutoTest feature that greatly increased the clients confidence in the system and reduced the number of calibration visits needed.

AutoTest increases confidence

AutoTest saves on manual testing costs
